BUILD UP BUSTER APPLICATION INFORMATION "BUBA"

PATENT PENDING

The Build Up Buster Application "BUBA" is a product to help control build up on the Eco Urinal Cartridge check valve and drain lines for waterless urinals.

"BUBA" is manufactured by Ecotech Water, LLC and based on field testing it is recommended that you pour about four ounces in each urinal every two months for light build up and four ounces every month if you are experiencing significant build up.

Ecotech recommends that the Eco Urinal Cartridge be checked approximately every month or so and if any build up is present treat each urinal as recommended above. This may also help control buildup in the sanitary sewer lines. It is not recommended for use in waterless urinals with a liquid seal type cartridge.
